SKILLS

Frontend

- React
- TypeScript
- Tailwind
- HTML/CSS
- JS

Backend

- PHP
- Laravel
- C#
- .NET
- C++

DevOps

- Docker
- Linux
- VPS OVH
- SSH
- Git

LANGUAGES

- French native
- English intermediate
- Dutch basic

QUALITIES

- Curiosity
- Autonomy
- Adaptability
- Team spirit
- Rigor

PROFILE

Fullstack developer in training (Bachelor in Management IT, evening classes). Front, back, API, infra — I cover the full stack, from the React interface to Docker/Linux deployment, because understanding the whole makes me better at each part.

What defines me: permanent curiosity, a taste for technical challenges that drive growth, and a stubbornness to understand how things actually work. I don't look for easy solutions — I look for the right ones.

I use AI like any good tool: with intention. To move faster on repetitive work, stay focused on what matters — and stay the one who delivers.

EDUCATION

- ↑ **Bachelier en Informatique de Gestion** 2023 – présent
EICE – cours du soir
Développement web, bases de données relationnelles, réseaux, POO.
- ↑ **CESS — Langues modernes, Maths, Sciences** 2015
Collège Saint-Vincent – Soignies

EXPERIENCE

- ↑ **Sauveteur en piscine — BSSA** 2018 – 2023
Surveillance et sécurité des nageurs, gestion des situations d'urgence. Sens des responsabilités et travail en équipe sur 5 ans.

PROJECTS

Hugruna TFE · featured
Laravel · PHP · React · TypeScript · MySQL · Docker
Marketplace e-commerce multi-vendeurs (Clean Architecture + DDD). Intégration Stripe, auth complète, upload multi-images, recommandations Mistral LLM.

Ecauspacine
.NET · C# · WPF · MySQL · Linux · SSH
App de gestion en équipe de 6. API REST + client desktop WPF. Accès DB via tunnel SSH. Full backend + 70% frontend.

AI Horizon Scanning
n8n · Docker · Claude API · RSS
Pipeline automatisé de veille IA — collecte RSS, analyse et scoring par LLM, export CSV.
