PROFILE

Junior Full Stack Developer with solid foundations in React/TypeScript, academic training in C#/.NET and hands-on PHP/Laravel experience from my capstone project. Bachelor's degree in Business Informatics (EICE, graduated October 2026 with the highest distinction). I design and deploy complete end-to-end applications: backend architecture, REST APIs, React interfaces, Docker/Linux infrastructure on VPS, through several concrete projects (e-commerce marketplace, management tools, AI automation). Freelancing part-time since June 2026, looking for a position where I can keep growing alongside a team.
